**BKA** TAGUNG 2013  
AUTUMN  
CONFERENCE

## **Cybercrime –**

### **Threat, Intervention, Defence**

BKA Autumn Conference, 12 - 13 November 2013

## **Digital threats and counter-measures from the perspective of industry**

Abstract

**Dr Thomas Kremer**

Member of the Board of Management Deutsche Telekom AG for Data Privacy,  
Legal Affairs and Compliance

The importance of cyber security is still underestimated. We still lack the necessary transparency regarding the scale of the attacks on German enterprises. Cyber security concerns all enterprises in all branches of industry. Today, the cyber attacks are often well co-ordinated and take advantage of the companies' simple weak spots. Companies have to face these challenges on a day-to-day basis. It is vital to integrate self-learning systems of protection into future security concepts to a greater degree. Modern prevention has to happen in real time. In his presentation Dr Thomas Kremer will outline strategies for responding to these challenges and explain what countermeasures are taken by the companies.
